

MEDIRECO

Product director @TwinBeans 2018

MEDIRECO is a black box that records crucial videos and information during surgery. Physicians can review and manage surgical records from various perspectives.

- Role:
 - Developing product strategy and roadmap. Prioritize user requirements.
 - Build and perform agile development process.
 - Market/User research.
 - Plan and design UX/UI. Write specs.
- Results:
 - Build the first integrated surgical recording product from scratch in Taiwan. It's the company's flagship product, contributing to over 70% of the revenue.
 - Installed in 80+ operating rooms nationwide and adopted by 70% of medical center-level hospitals in Taiwan.

MEDISTATION

Product director @TwinBeans 2019

MEDISTATION allows physicians to study surgical cases before and after operations from anywhere, enhancing their surgical capabilities.

- Role:
 - Developing product strategy and roadmap. Prioritize user requirements.
 - Build and perform agile development process.
 - Market/User research.
 - Plan and design UX/UI. Write specs.
- Results:
 - After the product launch, the company was able to plan large-scale projects for entire hospitals.
 - The value of hospital projects has increased significantly from 1 million to over 5 million dollars.
